

Score Energy Products Inc

Position: Mechanical Engineering Technician (Junior)

Location: Edmonton

Job type: Full time

Required Computer skills: CAD software and Excel experience. Will be required to use AutoCAD and some Solid Edge.

Work skills: mechanical aptitude, understanding of manufacturing processes, strong organizational skills, quantification and numerical skill, and application of continuous learning skills.

Tasks:

Assist in the production and compilation of custom valve orders by applying knowledge from records of previous similar jobs, knowledge of valve codes, metallurgy and corrosion.

Use of AutoCAD and Solid Edge to create and maintain parts drawings and assembly models.

Assist in the development and maintenance of work-flow systems and procedures.

Additional knowledge (an asset but not a requirement):

- Knowledge of and experience with industrial valves (and piping).
- Knowledge of industry codes: ASME B16.34, API 609, ASME Section VIII DIV 1, NACE MR0103.
- Knowledge of metals and metallurgy and casting.

Competitive salary and benefits.
